PLASTIC GRILLE DOOR/GATE SERIE P10M-P

MODELS

P10M-P

Plastic door grille. Horizontal slats.

DESCRIPTION

Our P10M-P SERIES plastic door grilles are designed to provide ventilation between rooms through panels or doors when they remain closed.

The arrangement of the slats prevents the view to the other side of the door, thanks to their design.

They are suitable for ventilation, heating and cooling installations.

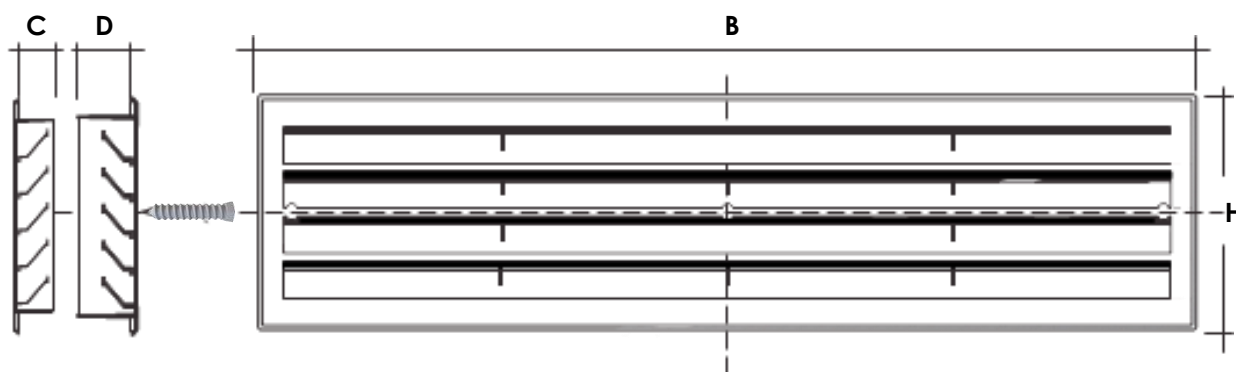

Specially designed to adapt to different thicknesses with the same model.

Each grille assembly is composed of two grilles, to be installed on each side of the door.

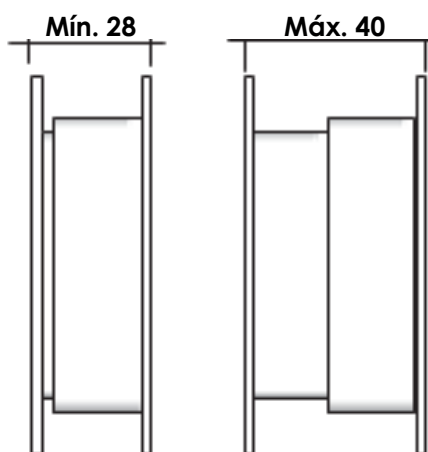

Available in various colors (white, brown or black) to enhance the aesthetics of the installation.

COLORS

The **P10M-P** SERIES grilles are made of injected plastic in the following colors.

White

Brown

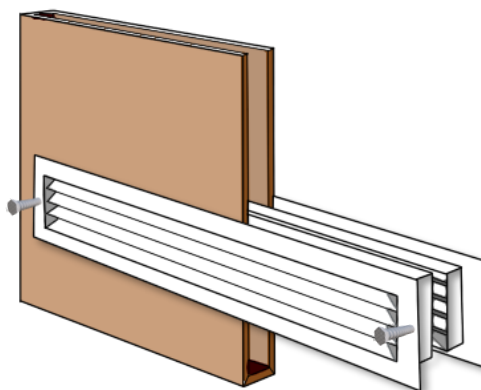

Black

FIXING SYSTEM

SCREW FIXING

For fixing, the two grilles must be matched. Tighten with the screws on one side only, until the desired thickness is achieved. This design avoids having to drill holes in the panel or door. Screws are included in the packaging.
